

Digital Purge & leak Kit

Nitrogen purging system is an electric kit that enables performing nitrogen purge, fill up and leak test for Night Vision Devices. Nitrogen purging and leak test is required for final assembly and as a basic Night Vision Devices maintenance measure in order to keep the interior part dry and clean.

With Tesoptics' nitrogen purging and leak system, this operation is fast, simple and safe.

System Includes

- ◊ Main Purging Control Unit (MPCU)
- ◊ Gas cylinder
- ◊ Nitrogen and NVD quick connection tubes
- ◊ Purge standard adapter – for PVS-7, PVS-14 and AVS-6
- ◊ Battery charging unit (12V/24V/110V/220V)
- ◊ Operation manual
- ◊ Heavy duty case
- ◊ Optional Purge adapters: M3, M6
